

Visual Mining Announces NetCharts Performance Dashboards for Microsoft Dynamics; Achieves Microsoft Certified Partner Status

New Solution Enables Users to Seamlessly Create and Deliver Business Intelligence and Financial Reporting Dashboards Directly from Dynamics Products

Atlanta, GA, April 26, 2010 -- Microsoft Convergence, Exhibit #539 – [Visual Mining](#), a leader in business intelligence (BI) dashboard and data visualization solutions that instantly transform data into actionable business information, proudly announces today the availability of NetCharts Performance Dashboards Solution for Microsoft Dynamics and its achievement of being recognized as a Microsoft Certified Partner.

NetCharts Performance Dashboards Solution for Microsoft Dynamics allows business end-users to easily incorporate data directly from Microsoft Dynamics applications into their dashboards for easy, intuitive analysis and financial reporting that will turn the information into invaluable business insight.

By easily connecting to any of the main modules of Dynamics (i.e., General Ledger, Accounts Payable, Purchase Order Processing, Sales Order Processing, Payroll, Project Accounting, CRM, etc.) end-users are empowered with the ability to build dashboards relevant to their business unit's or individual role, and benefit from a single, central version of the truth.

"NetCharts Performance Dashboards (NCPD) is easy to implement and integrate with a broad variety of data sources, including those our clients use daily, like Microsoft Dynamics and Excel. NCPD provides us with an easy, affordable way to add client value. By using NCPD, we have been able to strengthen our position as a trusted advisor to our clients," said Matt Adamowicz, COO and Co-Founder, T3 Information Systems, Inc., a highly successful VAR partner of Visual Mining. Through the many enhancements and resources added to its Worldwide Partner Program, Visual Mining's partners can ensure they maintain and strengthen their position as strategic advisors to their clients.

"Over the past several months, we've spent a lot of time working with customers and partners to better understand how we can add to and build upon their successes. We believe our new solution for Microsoft Dynamics, built with the award-winning NetCharts Performance Dashboards, provides the right answer for financial and accounting professionals wanting to move beyond their 'CPA' routine (i.e., copy, paste and assemble), and spend more time analyzing and understanding their data, forecasting, and driving better business results," said Tristan Ziegler, President and CEO, Visual Mining, Inc.

About Visual Mining

For more than a decade, Visual Mining continues to be a profitable, trusted and valued provider of business intelligence dashboard and data visualization solutions that instantly transform data into actionable business information. Visual Mining's award-winning NetCharts software delivers comprehensive, intuitive, and effective solutions for both developers and business end-users. Visual Mining's support and professional services teams complement its products by providing the expertise to ensure success.

NetCharts Performance Dashboards is a powerful, interactive, web-based dashboard solution that allows less-technical end-users to explore, analyze and understand data in ways they have not been able to before—on their own, and in ways relevant to their role. NetCharts products for developers (NetCharts Pro, Server and Designer) allow developers to rapidly create and deploy advanced data visualizations that are easily integrated with applications and data sources.

Visual Mining serves thousands of customers worldwide with close to a million users in industries ranging from banking, finance, government, healthcare, manufacturing, education, and communications. Visual Mining is a Microsoft Certified Partner. www.visualmining.com. Follow us on Twitter! www.twitter.com/visualmining.
