

Visual Mining Announces License Renewal With MRO Software For NetCharts® Pro

*Maximo Enterprise Suite (MXES) solution manages strategic
assets with critical KPI's, work flow and metrics.*

Rockville , Maryland - July 28, 2005 - Visual Mining, Inc., a leading developer of reporting and data visualization solutions, announced today that [MRO Software](#) has renewed their licensing arrangement of NetCharts® Pro, which provides interactive graphs for their Maximo® Enterprise Suite (MXES) solution.

"We found the NetChart's technology to be easy to implement and integrate into Maximo Enterprise Suite. The user interface, strong graphics package, ability to customize and professional looking visuals were some of the reasons we included this technology in MXES," said Gary Freeman, Vice President, Advanced Technologies. "The fact that it is a Java-based web architecture allows us to seamlessly integrate the capabilities delivered by NetCharts Pro into our solutions."

"By going with an existing solution, software providers are finding that they can quickly offer data visualization enhancements to their customers while not being distracted from their core competencies," said Michael MacDonald, CEO and Founder of Visual Mining. "NetCharts Pro's object API is extremely powerful and allows software developers to customize their data visualization in almost any way needed."

About Visual Mining, Inc:

Visual Mining builds interactive graphical reporting solutions for organizations needing maximum software flexibility and performance, but remaining within a reasonably priced budget. Visual Mining produced the first Java-powered charting engine in 1996. Since then, Visual Mining's NetCharts products have earned numerous industry awards, most recently, the 2003 Intelligent Enterprise Magazine's Readers' Choice Award for data visualization software, and was recently selected as a finalist in the Software & Information Industry Association's 20th Annual Codie Awards.
