

CorrectNet selects Visual Mining's NetCharts® to deliver graphical financial data for global fund asset managers and investors

CorrectNet's infiPOINT solutions service over 2,600 global funds, with over \$320B in assets being reported on a daily basis to a community of over 250,000 users

Rockville, Maryland - September 20, 2004 - Visual Mining, Inc., a leading developer of reporting and data visualization solutions, today announced that CorrectNet, Inc, selected NetCharts® to provide graphical data in their infiPOINT™ applications.

"Our clients want to show their data in graphical format wherever possible. Since the graphs are automatically generated from the data we store, the information is fresh every time and administration is a snap. 100% of our infiPOINT clients have the NetCharts feature deployed," said Jim Mancuso, Vice President, Sales and Marketing, CorrectNet. "NetCharts makes it easy for us to provide powerful graphic functionality to our clients. It is a stalwart of our service, expected by our clients, reliable, providing an unmatched professional presentation. We will continue to deploy NetCharts to all of our new clients."

"At a time when governance and compliance with regulations within the Sarbanes-Oxley Act and Bassel II are pressing factors for businesses, companies are looking for dependable solutions to maximize the accuracy of their reports. NetCharts has stayed the course for nearly a decade with more than 2,000 organizations deploying the technology worldwide; it is a tried and true solution that works flawlessly in nearly any environment," said Michael MacDonald, CEO and Founder of Visual Mining. "For solutions providers, using NetCharts to provide the data presentation layer for their applications makes sound fiscal and business sense."

About CorrectNet, Inc.

CorrectNet (www.correctnet.com) is the leader in Web Reporting and Data Consolidation solutions for asset managers. CorrectNet's infiPOINT™ platform acquires and stores data from virtually any portfolio, accounting, performance, risk, shareholder and other systems. Once consolidated, CorrectNet creates rich web reporting solutions that deliver this information via over 1,250 web sites, data feeds and as web services integrations. The Company supports the data management needs of over 2,800 funds, handles data in excess of 320 billion dollars in assets and operates data centers in the US, UK, Bermuda, Cayman Islands and Luxembourg.

About Visual Mining, Inc:

Visual Mining builds interactive graphical reporting solutions for business and government organizations needing maximum software flexibility, high performance, and low cost. Visual Mining produced the first Java-powered charting engine in 1996. Since then, Visual Mining's NetCharts products have earned numerous industry awards, most recently, the 2003 Intelligent Enterprise Magazine's Readers' Choice Award for data visualization software.
