

NetCharts Lands 2nd Place in JARS Top 1%

Rockville, Maryland, December 13, 2000- The JARS international panel of 104 judges, made up of prominent developers, reviews and examines submissions for the various categories. Currently JARS focuses its ratings primarily on Java resources.

NetCharts is a suite of 100% Java applets that allows HTML authors, web developers, and Java programmers to quickly and easily create on-line charts from virtually any data source, with minimal coding. NetCharts is extremely easy to use, features 13 very flexible chart styles, many adaptable chart features, and database connectivity. NetCharts applets can interact with users through drill-down; dynamic control by applet, form or JavaScript; pop-up labels; and scrolling & zooming.

About Visual Mining, Inc.:

Visual Mining offers a range of interactive data visualization tools that premier businesses, government agencies, and educational institutions use to take the wealth of information in a wide variety of data stores and make it meaningful and accessible to users throughout an enterprise or across the Internet.

Visual Mining's technology empowers enterprise users to make better and faster decisions, to share critical information in real-time, and to rapidly respond to business drivers and market conditions.

The Company's unique CDL Technology allows users to display flexible, complex charts from a myriad of data sources quicker and easier than any other solution available - saving valuable time in deploying projects and taking products to market.

The Company's unique CDL Technology allows users to display flexible, complex charts from a myriad of data sources quicker and easier than any other solution available - saving valuable time in deploying projects and taking products to market.
