

## Telesource Intl., Inc. selects Visual Mining's NetCharts ® Reporting Suite Software for reporting key performance metrics

**Rockville, Maryland - December 14, 2004** - Visual Mining, Inc., a leading developer of reporting and data visualization solutions, announced today that Telesource International, Inc chose NetCharts® Reporting Suite software for their financial and project management reporting solution. Telesource International will deploy the solution over the corporate intranet and use the reports during board meetings to better communicate key financial and project data.

"NetCharts Reporting Suite will help us increase employee productivity and offer the executive team a quick snapshot of all subsidiary operations," said Nidal Zayed, Executive Vice President & Chief Operating Officer of Telesource International, Inc. "We reviewed several competing products and felt that Visual Mining's was the most versatile and user friendly. We eagerly look forward to implementing the product for use throughout our corporate offices and subsidiaries worldwide."

"We've seen a tremendous increase in interest in our NetCharts Reporting Suite software by organizations that historically relied on legacy BI tools. We believe this to be primarily due to our software's flexibility and significantly overall lower cost of ownership," said Michael MacDonald, Founder and CEO of Visual Mining. NetCharts Reporting Suite provides decision makers the tools they need to turn raw data into real time, useable information needed to make critical decisions."

### **About Telesource International:**

Telesource International is a global company located in Lombard, Illinois. Telesource International effectively utilizes its subsidiaries to offer utility services, specialized construction and engineering services, project development and management, and plant operations. Telesource and its subsidiaries have offices in the Chicago area, on the Western Pacific islands of Tinian and Saipan, Guam and Palau and offices on the South Pacific island of Fiji. The Company's home page is at <http://www.telesource.org>.

### **About Visual Mining, Inc:**

Visual Mining builds interactive graphical reporting solutions for business and government organizations needing maximum software flexibility, high performance, and low cost. Visual Mining produced the first Java-powered charting engine in 1996. Since then, Visual Mining's NetCharts products have earned numerous industry awards, most recently, the 2003 Intelligent Enterprise Magazine's Readers' Choice Award for data visualization software.
